Sageer Kv
Full-Stack Developer

Experienced software developer specializing in Python Django with a year of self-learning. Currently working as an intern at Softroniics, with hands-on experience in all stages of the software development cycle. Enjoys collaborating with people from diverse backgrounds and building new relationships. Passionate about software development as a collaborative process that brings professionals together towards a common goal.

PROJECTS

Hospital management and patient booking website (01/2023 - Present)

Hospital Management & Patient Booking system
Github repository link: https://github.com/sageerkv/HOSPITAL-MANAGEMENT-AND-PATIENT-BOOKING-SYSTEM.git

*A hospital management and patient booking system website is a comprehensive online platform designed to streamline hospital operations and enhance patient experience. The website serves as a centralized hub where patients can easily book appointments with healthcare providers, access their medical records, and manage their healthcare needs from the comfort of their homes.then see the doctors detail and department details in the website.then include patient details in profile.
